the frame is now ready to
mount the brand items

more details on modular
clamp on next page

tighten the clamps

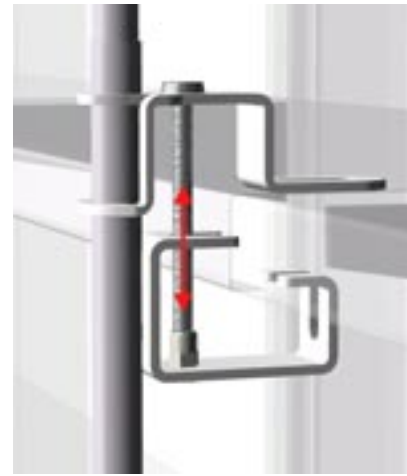

Modular shelf clamp

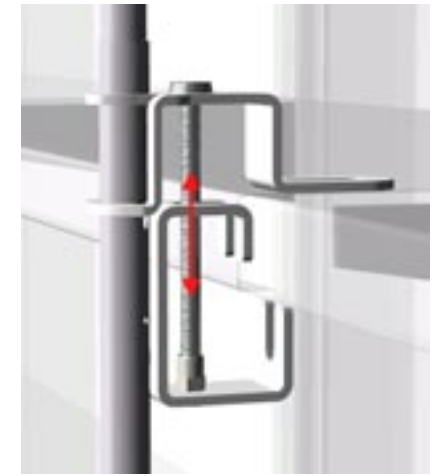

the clamp in parts:

- shelf part
- main bolt
- insert nut
- sliding part ¹⁾
- wire shelf bolt ²⁾

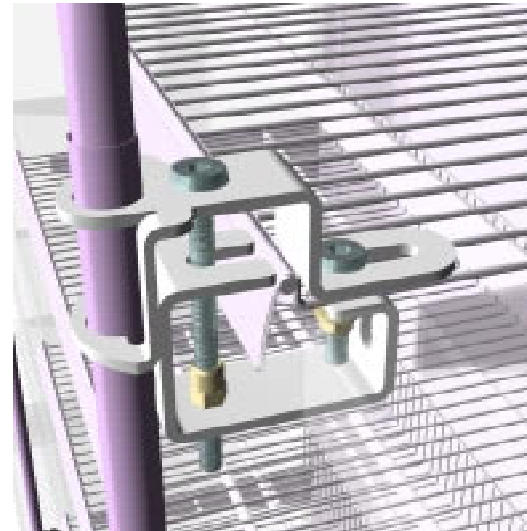

¹⁾ the sliding part can be used in two positions to avoid obstructions
²⁾ this additional bolt+nut can be used only on wire shelves

sliding part in general position
will suit standard shelves

sliding part vertical
used with limited back space

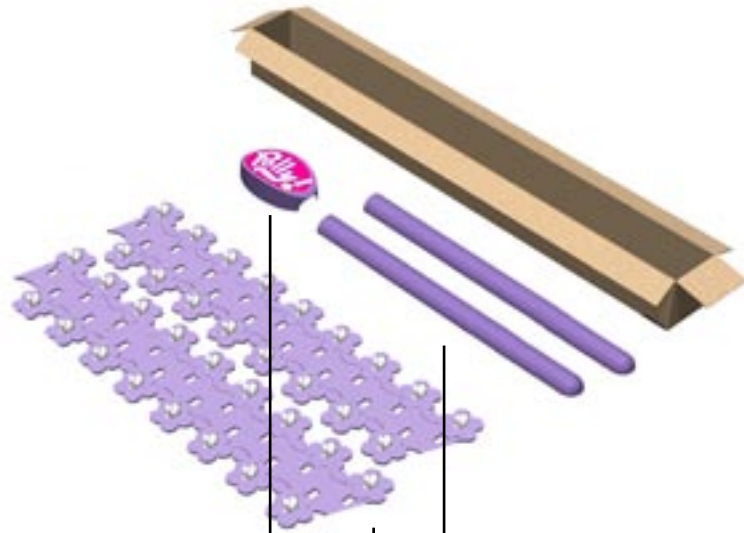

typical wire shelf situation
note the additional bolt on shelf

shelf clamp mounted with
Polly brand flowers

Polly Brand items

the box contains:

1 Polly horizontal header logo

2 Polly vertical brand strips ^{A)}

2 Polly horizontal header bars ^{B)}

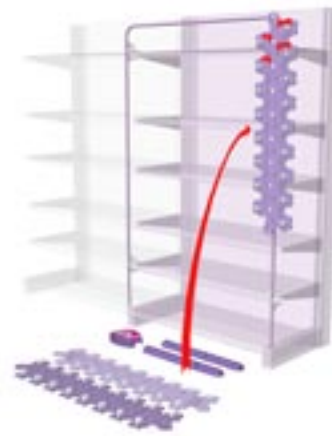

1) the flower strips can be cut to size with scissors.

2) Polly header bars can be cut to appropriate size with scissors.

Important:

an extension set is available to cover wider presentations and contains additional header elements

1

start from the top

4

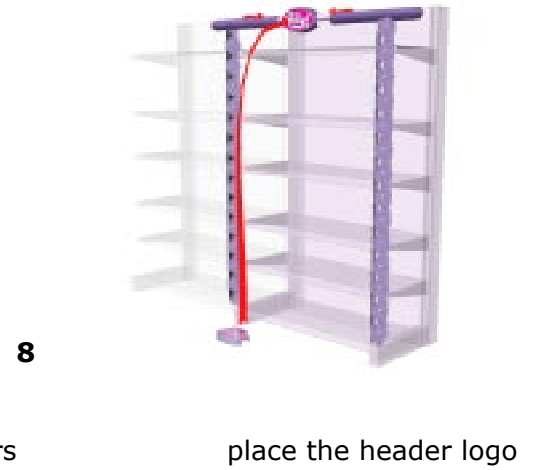

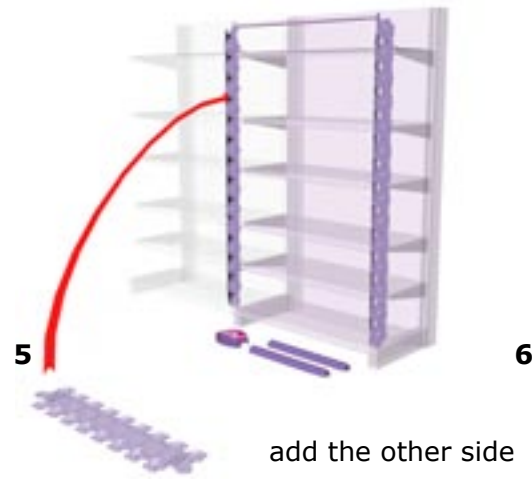

backside close-up

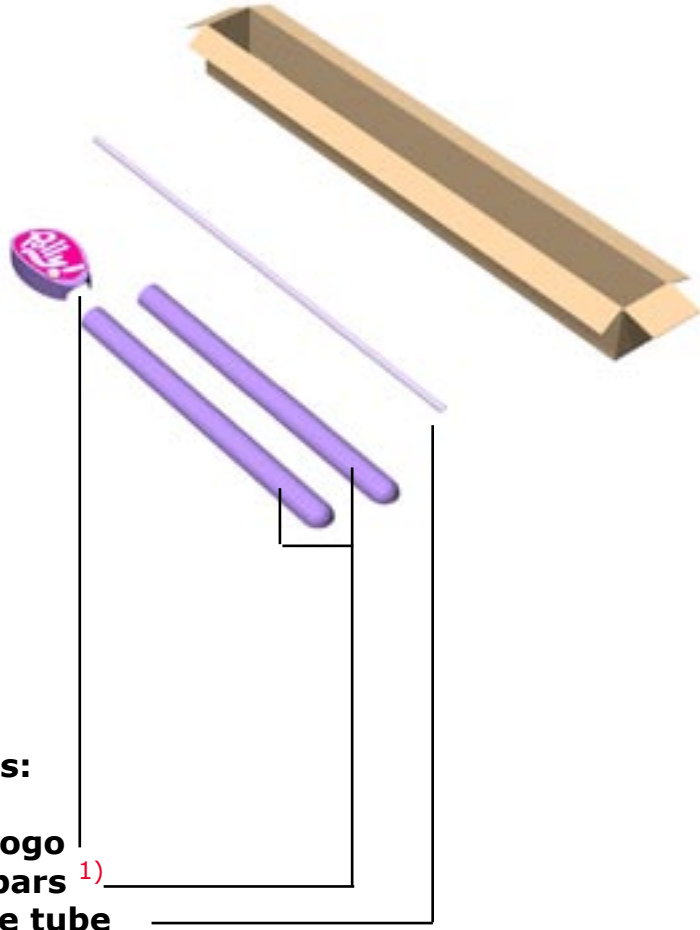

Polly Brand items

typical Polly Pocket Brand presentation

Modular frame extension

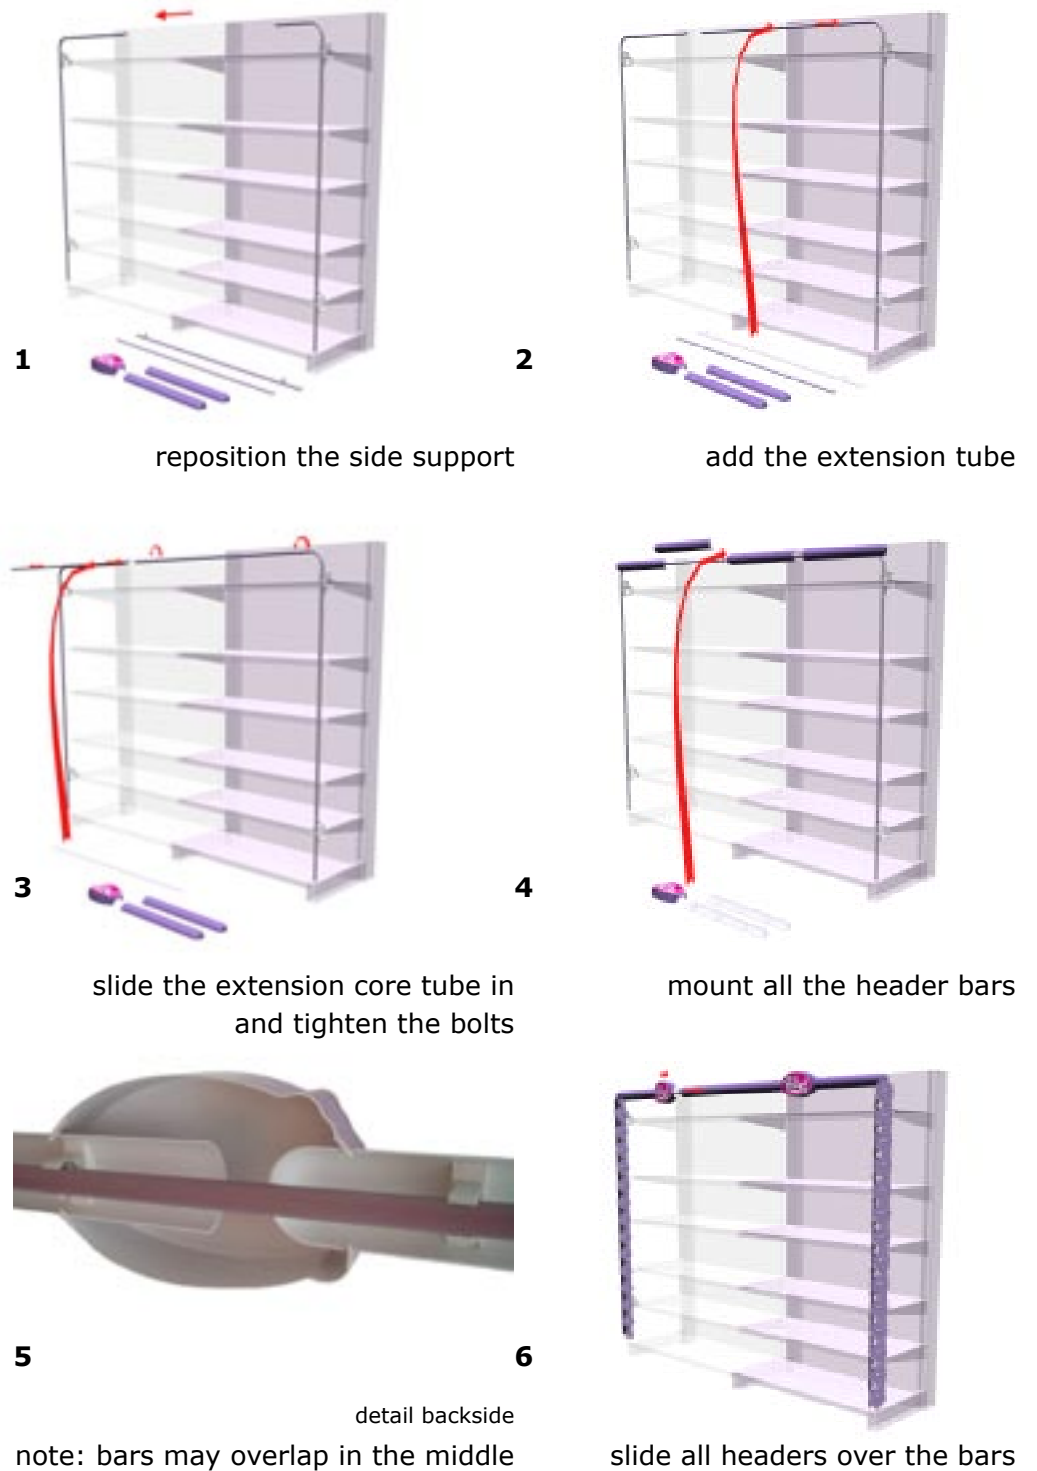

the box contains:

- 1 polly header logo
- 2 polly header bars 1)
- 1 extension core tube

1) Polly header bars can be cut to appropriate size with normal scissors.

one extension set covers shelf space up to 2-3 shelf meters.
its aim is to add branding to the presentation.

1

reposition the side support

2

add the extension tube

3

slide the extension core tube in
and tighten the bolts

4

mount all the header bars

5

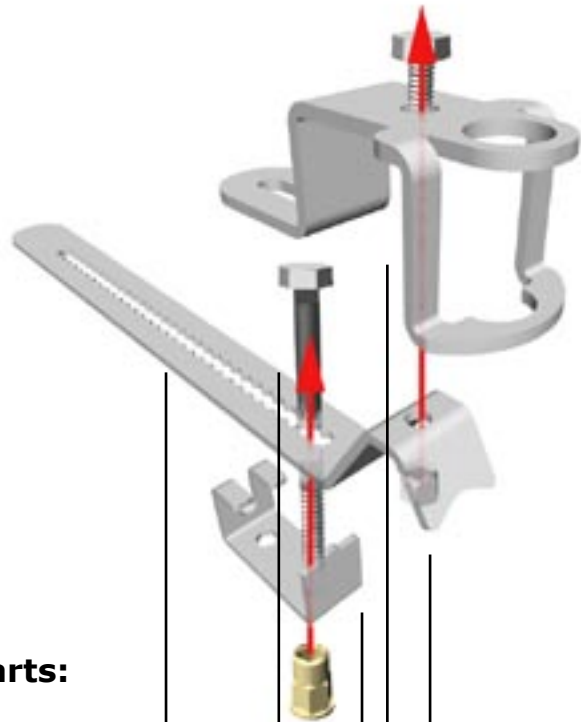

detail backside

note: bars may overlap in the middle

6

slide all headers over the bars

Modular stepped shelf extension

extension parts:

extender part

medium bolt

rivet nut

sliding part ¹⁾

shelf clamp part

short bolt & nut ²⁾

1) the sliding part can be used in two positions to avoid obstructions

2) this additional bolt+nut is normally used on wire shelves

the stepped shelf extender is used when shelves have different depth

the extension is first mounted to the clamp position the extender on the designated shelf lock the extender with a short bolt to the sliding part
